PUMP & SUPPLY, INC.

# BLACK GOLD PUMP & SUPPLY, INC.

Black Gold Pump & Supply Inc. is a full service global supplier to the oil and gas Industry. Black Gold, head quartered in Canadian, Texas, has proudly served the oil and gas rig industry on a global basis since 1982. As a full service provider, our global clients have access to over 5,000 oil and gas drilling production parts and products.

With the largest oil and gas related inventory in the Texas and Oklahoma Panhandles, Black Gold is firmly committed to maintaining its position as a premium supplier to the oil and gas industry. We maintain an extensive parts inventory of current and out-of-production equipment. We are completely equipped to handle well hookups, drilling rigs, well servicing needs, roustabouts, and all types of special orders.

As a premium supplier to the oil and gas industry, we represent only premium brands. Our reputation and customer base has enabled us to secure representation for many premium brand manufacturers that together meet all the needs of our oil field clients. Our clients can be found from the Texas and Oklahoma Panhandles to Central Asia. Our global experience ensures we know all the aspects and challenges for efficiently supporting oil and gas drillers, producers, and service companies.

Our goal is to ensure quality service at a fair price. We have been in the same location for more than 25 years. We have seen the patch boom and bust. Through it all, we have remained, continuing to serve you, our valued customers.

We carry a large inventory to ensure that anything our clients require is available on a 24/7 basis so that they can work around the clock with no interruptions due to lack of supply. Our long list of repeat customers is testimony to our success as a premium supplier to the oil and gas industry.

*"Our equipment is used around the globe, from Texas to all the world's locations drilling for oil and gas."  
Ken King - President Black Gold Pump & Supply, Inc.*

*Our long list of repeat customers is a testimony to the success of Black Gold Pump & Supply, Inc. as a premium supplier to the oil and gas industry.*

**Bridges Equipment LTD product distributed by  
Black Gold Pump & Supply, Inc.  
your premium source for Drawworks & Mud Pumps**

Black Gold Pump & Supply, Inc. found in Bridges Equipment LTD a valuable partner for the supply of drawworks, mud pump packages and manufactured parts.

Bridges has been supplying equipment to the oil and gas industry for more than a quarter of a century. In that time, they have established a reputation for supplying quality products backed by a very knowledgeable and experienced staff.

Headquartered in Odessa, Texas, Bridges has an 80 acre facility with full manufacturing and fabrication capabilities.

Black Gold's mud pumps are packaged by Bridges Equipment. Throughout the global oil and gas fields, Bridges Mud

Pump packages have an unequalled reputation for reliability and performance.

Bridges' Odessa facility has extensive machining capability for large oil and gas industry equipment. In addition to refurbishment, Bridges uses its machining capability to manufacturer its own design of diesel and electrical powered drawworks. Drawing from its extensive experience in supplying the oil and gas industry, Bridges was able to develop a drawworks with design features that demonstrates enhanced performance and reliability over other brands.

Engineering is a key resource of Bridges. Its engineering team has the knowledge and software to design new equipment and also to reverse engineer. In Bridges, Black Gold has a resource for sourcing components no longer available from the original manufacturer plus the ability to meet the specific special and "one-off" needs of Black Gold customers.

*"We find Black Gold a premium outlet for our manufactured drawworks and mud pump packages."  
Mike Bridges - Owner Bridges Equipment LTD.*

*Bridges Equipment LTD is not only a premium source for manufactured and packaged oil and gas field equipment, but also an important partner in meeting the specialized needs of Black Gold Pump & Supply customers.*

**Black Gold Pump & Supply, Inc.**  
 is able to supply replacement parts for  
**Oil and Gas drilling rigs in and out of production**

Cardwell produced an excellent line of rigs. Many of these rigs are still in active service throughout the world's major oil drilling locations. Black Gold has extensive experience with Cardwell rigs through its sister company, King Well, which operates a fleet of Cardwell rigs. When Cardwell ceased production, we used our own expertise and connections with Bridges Equipment's fabrication and engineering to ensure an ongoing parts supply.

Black Gold not only carries one of the largest inventory of rig parts and can also supply reverse engineered components. Clients that use Cardwell rigs can rely on Black Gold for continued support of their equipment with new parts, refurbished parts or remanufactured parts built to specific requirements.

If you are an user of or supplier to a Cardwell rig, contact Black Gold regarding any parts requirements you have. If the part cannot be found in our extensive inventory, Black Gold will arrange to have it remanufactured.

In addition to supporting Cardwell rig operators throughout North America, we have supplied many rig parts and systems to clients in Russia, Indonesia and South America. Cardwell operators throughout the world have taken advantage of Black Gold's ability to support oil and gas drilling equipment no longer supported by the original manufacturer.

Through Black Gold, users of premium drilling equipment can rely on many more years of productive operation of their equipment.

*"We rely on Black Gold for the continued support of our extensive fleet of drilling rigs. Their ability to meet all our parts needs for rig products no longer supported by the manufacturer is invaluable."*  
 Terrel Hardin - President King Well

**Black Gold Pump & Supply, Inc. supplies  
Gardner Denver parts  
from a comprehensive inventory**

Black Gold Pump & Supply, Inc. has a comprehensive inventory of new and out of production parts for Gardner Denver equipment.

Twenty years experience in supplying the oil and gas industry has enabled Black Gold to develop a comprehensive knowledge of the industry's requirements. This experience

has enabled us to build a strong team of suppliers for current and out of production equipment parts. Whatever Gardner Denver equipment you have, you can rely on Black Gold to supply your needs.

In our Canadian, Texas, location, we carry an extensive inventory of parts for Gardner Denver drawworks, swivels, hooks and rotary tables.

What ever your Gardner Denver equipment needs, contact Black Gold. If we cannot supply you from the largest oil and gas industry inventory in the Texas and Oklahoma Panhandles. We have the sources to rapidly meet your needs. Black Gold is on constant lookout for new inventory of parts for premium oil and gas equipment.

From our Canadian, Texas, location, we ship Gardner Denver parts around the globe to any location. Rely on our team and its knowledge to move equipment around the globe.

Our professional parts technicians have many years of experience and product knowledge on the various models and series of Gardner Denver oil field equipment.

Contact us with your requirements and learn first hand why Black Gold is recognized as a premium parts supplier.

*"We have never failed to meet the parts requirements of our customers using Gardner Denver equipment."  
Cory Pittman - Black Gold Pump & Supply*

*Twenty years experience in supplying the Oil and Gas industry has enabled Black Gold to develop a comprehensive knowledge of the industry's requirements.*

**Black Gold Pump & Supply, Inc. supplies  
Diamond Chain  
from a comprehensive inventory**

Black Gold has built a reputation for supplying quality equipment to the oil and gas industry. That's why we supply Diamond Chain products. Diamond Chain is a premium manufacturer of chains for power drive and has extensive experience in oil and gas field applications.

Roller chains used in the oil and natural gas industries are subjected to great loads and harsh environments. These conditions are far more severe than usually found in more common industrial applications. These oil field chains can be either single or multiple strand and are typically constructed using heavy series components.

Diamond Chain produce their oil field chains with the same attention to detail that goes into all our products, but also subjects these models to performance testing in accordance with American Petroleum Institute Specification 7F. Users of our chains can be certain they are receiving the highest quality, best performing roller chains by examining the label on the box, which displays the API logo. Only those companies that have established quality systems, approved and routinely audited, are authorized to display this symbol.

In today's environment, Diamond focuses on the increased use of technology but follows the same inventive, grass roots philosophy it was founded on to provide customers with a high quality product with the best balance of performance, reliability, price and delivery to meet or exceed their requirements.

*"Whether it be the chain carrying the power or the sprocket being driven, Black Gold has the right equipment to meet the rigorous demands and standards of the Oil and Gas industry."*

*Only those companies that have established quality systems, approved and routinely audited, are authorized to display the American Petroleum Institute symbol.*

**Black Gold Pump & Supply, Inc. supplies a comprehensive range of Balon Valves, recognized as inherently superior for the Oil and Gas Industry**

Balon has established a reputation for providing ball, check and needle valves that have proven their mettle and become the standard by which all others are judged.

Black Gold only likes to work with the best. Balon was founded in 1965 and designs products for the oil and gas industry that are recognized as inherently superior to others. Balon leads on innovation and can claim many of the following industry firsts.

- Ball Valve Firsts-**
  - First backseated blowout-proof stem
  - First grooved and tapered seats
  - First stem safety shear groove
- Check Valve Firsts-**
  - First with fully replaceable disc and seat module
  - First check valve design backed by more than thirty patents
- Needle Valves-**
  - First with split-seat design, virtually eliminating seat fracture.

The **Balon Ball Valve** has eliminated the need for grease fittings, lube channels, and regular lubrication that other designs require. Stems are backseated and therefore blowout proof.

The **Balon Check Valve** design is a total departure from the tired design of commonly available check valves. It incorporates an innovative disc and seat module. With this innovation, Balon has been able to eliminate hazardous screwed and bolted bonnets.

The **Balon Needle Valve** is the result of many design inputs directed at a total solution to needle valve problems, not one or two isolated and limited variations of outdated concepts.

*“Balon Ball Valves has eliminated the need for grease fittings, lube channels, and regular lubrication, versus other designs.”*

*Balon has established a reputation for providing ball, check and needle valves that have proven their mettle and become the standard by which all others are judged.*

## Black Gold Pump & Supply, Inc. offers Kimray Quality Valves and Controls for the Oil and Gas Industry Worldwide

Black Gold Pump & Supply, Inc. carries a large inventory of Kimray flow control and metering equipment to meet our oil and gas industry clients' wide range of needs in North America and markets worldwide.

Kimray machines iron, steel, aluminum and thermoplastic materials, to build a comprehensive line of control valves, thermostats, energy-exchange glycol pumps, gas operated pilots and other control devices. Kimray products are used to control vessel and lead line temperatures, liquid level inside pressurized vessels, pressure drops, and liquid and gas flow.

*Kimray products are supplied to control the following equipment:*

**Compressors-** Suction pressure, low suction recirculation pressure, high discharge recirculation pressure, scrubber liquid level and heat exchanger air temperature.

**Scrubber-** Liquid level controller and dump valve.

**Line Heater-** Inlet flow, burner control, high temperature shut-in, pilot flame monitor shut-in, and low liquid level shut-in.

**Production Unit-** Inlet flow, pressure, liquid levels, heater controls and fuel gas.

**Level Control-** Mechanical float trunnion, treater valve, simple float operated pilot, adjustable operated float pilot, electric level switch, and high and low pressure floatless pilots.

**Dehydrator-** Liquid levels, reboiler temperatures, fuel gas, instrument gas, glycol circulation and vessel pressures.

**Heater / Treater-** Vessel pressure, liquid levels and liquid temperatures.

**Separator-** Vessel pressure and liquid levels.

**Free Water Knockout-** Vessel pressure and liquid levels.

*"Kimray is represented domestically by nine distributors in North America and in nine countries, providing product, application, on time delivery, and service after the sale."*

*Kimray products are designed for serviceability. You can repair a 3" SGT-BP purchased in 1948 with a repair kit purchased for the same model being produced today. This commitment to non-obsolence has been a trademark of Kimray design since the beginning.*

## Black Gold Pump & Supply, Inc. offers Kemper unions to meet a wide range of oil and gas field applications

Black Gold stocks more than 5,000 parts, including the unions, fittings and clutches our oil and gas field clients require. The Kemper Valve & Fittings Corporation, has been making pipe unions for 40 years and is best known for its line of oil field hammer unions.

Kemper Valve & Fittings Corporation, one of the largest manufacturers of oil field hammer unions in North America, also manufactures valving and other flowline products used throughout the oil and gas industry.

*Kemper products are supplied for the following applications:*

- Unions-** Oil field unions, Hammer-Seal unions, Seal-O-Grip connections and industrial unions.
- Crossovers-** Unions for crossover, swages and blanks.
- Pup Joints-** Integral non-pressure seal.
- Swivel Joints-** To codes silver, black, and red.
- Hose Loops-** To codes silver, black, and red.
- Flow Line Valves-** Dart checks, swing checks and relief checks.
- Integral fittings-** Tees, crosses, ells, laterals and radius.
- Valves-** Non-freeze tank valves and model "B" butterfly.

Kemper Hammerseal Unions are designed to quickly join mud tanks without the work associated with flanged connections. Even if the tanks are not aligned perfectly, Kemper Hammerseal Unions can still be made up tight for a non-leak seal. The externally threaded female portion of the union welds to a stub of pipe at the tank wall. Connecting pipe extends through the nut, the macro o-ring and then into the female. When the internally threaded nut is hammered tight onto the female, the captive o-ring is compressed into a "D" square cross section, sealing fluid pressures up to 150 psi against the outside diameter of the connecting pipe.

*"Black Gold stocks more than 5,000 parts, including the unions, fittings and clutches our oil and gas field clients require."*

*The Kemper company has been making pipe unions for 40 years and is best known for its line of oil field hammer unions.*

## Black Gold Pump & Supply, Inc. offers Eaton Airflex clutch and brake components for oil and gas field applications

Clutch and brake components are another key item for the oil and gas development industry. Black Gold stocks the Eaton Airflex product, recognized as an industry leader in a wide range of clutches and brakes.

Airflex products are used in the oil field industry on drilling equipment such as drawworks, top drives, rotary tables, engine drives and also on mooring systems for offshore applications.

The oil and gas market has come to depend on Airflex components for quality, performance, reliability, superior controllability and a lower total cost of ownership. Eaton provides a comprehensive selection simulation procedure which insures that our brake meets the customer's needs, with oil field Industry-recognized service factors.

Airflex products are backed by superior technical support from experienced field sales and application engineering teams. Our professionals work closely with drawworks OEMS, drilling contractors, and service personnel to assure proper selection of braking systems and customized features.

Airflex CB element assemblies are used as both clutches and brakes in general power transmission service. The primary feature of the CB design and construction is the Airflex torsional resilient principle made possible by the transmission of power through the side walls of the flexible neoprene and cord actuating tube. This flexibility also permits minor shaft misalignment.

*"Black Gold Pump and Supply provides their oil and gas industry clients a premium line of clutches and brake components with the Eaton Airflex line that has a worldwide solid industry reputation."*

*Airflex products are used in the oil field industry on drilling equipment such as drawworks, top drives, rotary tables and engine drives.*

## Black Gold Pump & Supply, Inc. supplies Ridgid Tools for oil and gas site development and maintenance

Black Gold Pump & Supply, Inc. provides to their oil and gas industry clients an one-stop supplier for all their needs. Our experience in supplying the oil and gas market for more than a quarter of a century gives us the knowledge that total supply includes all the tools necessary for preparing and maintaining an oil and gas field site.

Black Gold Pump & Supply, Inc. know that only the most reliable and durable tools can and should be used on an oil and gas site. In many cases the site is remote and the crew cannot tolerate delays due to tool failure or unsuitability.

Ridgid tool are a premium manufacturer of industrial tools suitable for oil and gas field operations. Black Gold Pump & Supply, Inc. offers their clients a range of Ridgid tools to cover many applications on oil and gas industry development and production sites.

Whether it is routine maintenance or heavy pipe cutting Black Gold Pump & Supply, Inc. can furnish your on-site needs as regards tools for equipment preparation and maintenance. Contact us regarding your application and tool requirement and we will supply the right tool for the job.

Black Gold Pump & Supply, Inc. will use their considerable experience of the oil and gas industry and contacts with premium tool manufacturers such as Ridgid to meet your needs and ensure your crew are using the most reliable and effective tools, whatever the task.

*“Black Gold Pump and Supply provides their oil and gas industry clients a one-stop supplier for all their needs, including all the tools a crew will need on site to get the job done right.”*

**Black Gold Pump & Supply, Inc. supplies all the accessories for oil and gas site development and maintenance including Anchor Paint and Sheffield Fencing**

Black Gold Pump & Supply, Inc. provides to their oil and gas industry clients an one-stop supplier for all their needs. Our experience in supplying the oil and gas market for more than a quarter of a century gives us the knowledge that total supply includes support items such as paint and fencing.

Our Anchor paint is tested on site to provide the coatings best suited to withstand violent and unpredictable weather. Anchor realizes its nationally and internationally sold products may be used in a multitude of service environments. Therefore, Anchor products are also tested in climates such as southern Florida and the northeastern United States. Anchor products excel in weather resistance, durability, color retention, gloss retention, stain resistance and other significant performance criteria. Anchor paints are highly suitable for an oil and gas site environment.

Sheffield Fence products are the ultimate in galvanized fencing. Sheffield Fence wire is coated using a hot dip strand galvanizing process that meets or exceeds ASTM Class I galvanized coating specifications. These specifications are set by the American Society for Testing and Materials that was started in 1898 to assure that the standards set by industry were measured equally. We follow those standards to assure a long life product. Class III coatings also available.

*“Black Gold Pump and Supply provides their oil and gas industry clients an one-stop supplier for all their needs. And one-stop means everything from heavy equipment to paint and fencing for the site.”*

*Anchor paint is tested on site to provide the coatings best suited to withstand violent and unpredictable weather. Anchor realizes its nationally and internationally sold products may be used in a multitude of service environments.*
